

# Manufacturers of Plastic and Stainless Steel Products

### Valve Manifold Box

The Smart Valve Manifold Box is a three to eight stick point-of-use VMB with the option of local intelligence that insures the chemical delivery to the process tool.

### Drum / Bottle Wash Station

The Drum / Bottle Wash Station is capable of washing 1 Drum and 12 Bottles at the same time. Is equipped with adjustable timers for length of wash. Has interlocks to shut down washing if doors are opened.

### Bulk Chemical Dispense Unit

Advanced Plastic Services (APS) provides a full line of Chemical Dispense Units both in polypro and stainless steel, engineered for Ultra Pure dispense, reliability, serviceability and survivability.

### Gas VMB / Panels

The Gas Valve Manifold Box / Panel is a compact design that allows up to 8 point of uses.

Separate control box is available.

### R & D Units

The R & D Units are a compact design that is an economical solution for backing up existing Chemical Delivery Units, or for low use applications delivering chemical directly to the fab.

### Hoods

Our Hoods come standard with:

- Sinks
- DI/N2 Spray Guns
- Lights
- GFI Plugs
- Storage Compartments

Products available but, not limited to.  
All design work is done on the latest CAD software.

APS is women owned and certified.
